

At Hannon Electric Company, when it comes to a lathe...

Big is Better

zero thru
one
hundred
ton
capacity

Our new lathe can handle many large jobs, and any mechanical or electrical rotating device. When you need to repair large shafts, pumps, fans and gears of all sizes, big motors, armatures and rotors – call the Hannon Electric Company.

When Hannon Electric goes big they mean it, a lathe with zero thru one hundred ton capacity, 130 inch swing, center to center of 27 feet.

**WE ARE CONTINUOUSLY
IMPROVING...
TO BETTER SERVE YOU!**

Eliminate Transportation Time and Costs

We have developed a large **portable** oven for insulating, cleaning and baking. That means...if size is an obstacle for transporting, we will come to you! We can separately turn, undercut and machine – **all at your location**. We'll get you back on the job fast!

We specialize in **rebuilding all sizes and types of electric apparatus** – from those that fit in the palm of your hand through 100,000 hp.

Our services, equipment and experienced professionals are available **24 hours a day, every day**. We're just a phone call away!

The only in-house limitation we have is the size of our back door.

**WE
CAN
COME
TO
YOU**
